

Montso Ernest Moalosi

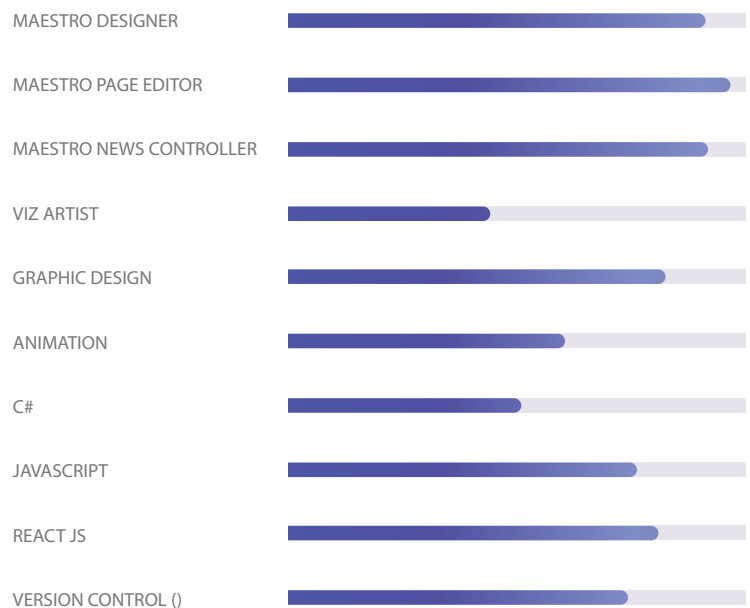

BROADCASTING GRAPHICS DEVELOPER

About me

I'm an experienced professional in the TV industry with Newzroom Afrika. I build interactive live graphics. My strength lies in the technical aspect, whereas I oversee broadcasting graphics and program advanced live graphics. I have also expanded my skills by enrolling in coding courses and bootcamps, where I have learned C# and web development. This knowledge has enabled me to create applications for our TV live graphics data management. I'm passionate about generating innovative ideas that streamline tasks and enhance efficiency. My programming stack includes C#, WPF, .NET MAUI, JavaScript, React, Node.js, and MongoDB. I utilize tools such as Avid Maestro Designer, Avid Page Editor, Avid News Controller, Viz Artist, and Adobe Creative Suite applications. I'm dedicated to continual learning and I easily adapt to new technologies.

Outside of coding, I enjoy video games, Anime, spending time with family, and enjoy learning new activities.
